

SAMUEL DHARMA SUKATJA

Hsinchu, Taiwan | (+886) 903894725 | samuel.sukatja@gmail.com | samueldharma.com | [LinkedIn](#) | [Github](#)

EDUCATION

National Tsing Hua University <i>Bachelor of Electrical Engineering and Computer Science CGPA: 3.84 / 4.30</i>	Hsinchu, Taiwan <i>Graduation Date: June 2025</i>
Relevant Coursework: Introduction to Programming, Introduction to Python, Logic Design, Logic Design Lab, Data Structures, Algorithms, Data Mining, Software Studio, Introduction to Machine Learning, Network Security, Computer Network, Operating System, Software Engineering, Programming for Business Analytics, Applied Cryptography	

EXPERIENCE & ACHIEVEMENT

Vistra <i>Software Developer Intern</i>	Jakarta, Indonesia <i>Jul 2024 - Aug 2024</i>
- Implemented a web-based system to automate payment voucher approvals, reducing processing time by 30%. - Developed a customized algorithm to accurately route payment voucher forms to approvers based on their roles, resulting in a 40% decrease in errors.	
Benemica <i>UI / UX Intern</i>	Jakarta, Indonesia <i>Aug 2023 - Sept 2023</i>
- Developed a user-friendly interface for the Benemica Payroll Software, resulting in a 20% increase in client satisfaction and a 15% decrease in support tickets. - Conducted usability testing on the new web-based platform feature, leading to a 25% improvement in overall software functionality.	
National Tsing Hua University <i>Scholarship</i>	Hsinchu, Taiwan <i>2023 - 2025</i>
Received a scholarship from National Tsing Hua University for two consecutive academic years.	
Tricor <i>Internship</i>	Jakarta, Indonesia <i>May 2021 - Jun 2021</i>
Streamlined payroll processing for over 50 clients' employees, reducing errors by 15% and ensuring timely salary payments.	

PROJECT

Personalized AI Tutor For Programming <i>Developer, Project Manager</i>	Hsinchu, Taiwan <i>2024</i>
- Engineered a 95%-accurate personalized AI coding assistant by constructing a knowledge graph with RAG and GPT-4, improving users' learning efficiency and providing custom feedback. - Increased solution accuracy by 70% by designing a Problem-Code Matcher to analyze code errors, retrieve historical cases, and deliver actionable feedback.	

Image Captioning for Visually Impaired

Hsinchu, Taiwan

Programmer, Tester

2023

- Collaborated with a team of developers to integrate advanced facial recognition algorithms into the image captioning system, resulting in a 75% improvement in overall accuracy and efficiency.

What's In My Fridge

Hsinchu, Taiwan

App Developer

2023

- Developed a mobile app that serves as an online fridge helping users manage their ingredients and discover new recipes aiming to lower food waste.

PyMoney

Hsinchu, Taiwan

Programmer

2022

- Build a user-friendly GUI Python program that tracks expenses and improves personal financial management by including tables that enable users to understand their spending habits and identify areas for improvement.

SKILLS, INTERESTS, CERTIFICATES

Programming: C, C++, Python, Java, Git, HTML, CSS, JavaScript, React, Node, Bootstrap, PHP, MySQL, REST API, R

Languages: English (C1), Mandarin (A2), Indonesia (Native),
